## SUMMARY

---

Software Engineer with 6+ years designing and deploying scalable, cloud-native microservices and event-driven systems across healthcare and enterprise domains. AWS Certified Solutions Architect – Associate with hands-on expertise in Java/Spring Boot, Apache Kafka, React/Angular, and end-to-end CI/CD delivery.

## TECHNICAL SKILLS

---

**Languages:** Java 17/21, TypeScript, JavaScript, SQL

**Backend:** Spring Boot, Spring Security, Spring Modulith, Spring Data JPA, Microservices, REST APIs, Apache Kafka, SQS

**Frontend:** React, Angular, TypeScript, Vite, Axios

**Cloud & DevOps:** AWS (ECS, EC2, S3, DynamoDB, OpenSearch, CloudWatch, Secrets Manager), Docker, Jenkins, IBM UrbanCode Deploy

**Other:** Okta / OAuth 2.0 / JWT, Splunk, Oracle, MySQL, JUnit 5, Mockito, Git, Jira, Confluence

## PROFESSIONAL EXPERIENCE

---

**LabCorp** *Software Engineer* | Durham, NC

**July 2023 – April 2026**

- Architected scalable microservices using Java 17/21 and Spring Boot, powering high-throughput event processing for healthcare systems serving millions of lab orders.
- Designed event-driven architecture with Apache Kafka and SQS, achieving near-zero message loss and eliminating processing bottlenecks across decoupled services.
- Engineered a Spring Boot + AWS OpenSearch integration with optimized DSL queries, significantly cutting search latency for clinical operations teams.
- Designed Amazon DynamoDB schemas for subscription and notification data, achieving high availability and sub-millisecond read/write latency at scale.
- Secured microservices with Okta-integrated OAuth 2.0 and JWT; deployed via Docker on AWS ECS/EC2 and owned Jenkins/IBM UrbanCode Deploy CI/CD pipelines.
- Built React/TypeScript/Vite and Angular 16/17 frontend modules integrated with Spring Boot REST APIs, and designed MCP servers enabling AI assistants to interface with internal dev tools.

**Capgemini** *Senior Software Engineer* | Chennai, India

**June 2018 – February 2022**

- Architected a microservices-based enterprise deal management platform using Java 8 and Spring Boot, modularizing submission, approval, and assignment workflows.
- Designed and delivered scalable RESTful APIs supporting deal management workflows, reliably handling high volumes of concurrent requests across distributed teams.
- Built enterprise dashboards using Angular 8/9 and TypeScript with reusable components enabling real-time submission and approval tracking.
- Optimized Oracle and MySQL schemas with PL/SQL procedures and triggers, improving query performance and enforcing business rules.
- Automated approval workflows using jBPM and TIBCO, and maintained Jenkins/Maven CI/CD pipelines, reducing manual deployment overhead.

## EDUCATION

---

**University of Central Missouri** — Master of Science in Computer Science, Warrensburg, MO

**Jan 2022 – May 2023**

## CERTIFICATIONS

---

**AWS Certified Solutions Architect – Associate** | Amazon Web Services | Issued 2024
